

Plastic Bottle Unscrambler

NECOSORT-S3 (Space x Speed x Savings)

Accepts bottles from a random bulk supply and single files them onto a discharge conveyor.

*Nalbach Engineering's NECOSORT-S-3 Plastic Bottle Unscrambler reduces maintenance and downtime and does it with less **Space**, higher **Speed** and price **Savings**.*

The time tested Nalbach NECOSORT plastic bottle unscrambler has been redesigned to be smaller, faster, and cost less. It sorts a wider range of rigid container shapes, including rounds, ovals, squares and rectangulars. With easy release clamps and unitized change parts, changeovers are fast and simple, allowing a single employee with no special skills to complete a changeover in twenty minutes or less. Designed with only two moving parts, virtually eliminating downtime, the NECOSORT-S-3 carries a three (3) year warranty!

Benefits

- With no reciprocating motions, complicated mechanisms or hard to adjust container handling parts, maintenance and downtime is virtually eliminated.
- Stainless steel change parts and other bottle contact parts provide for exceptional durability.
- Stainless steel machine and change parts insure no particulate matter is created making the NECOSORT-S-3 suitable for clean room operation.
- Large number of pockets permits slow sorting of each individual bottle, providing for remarkably gentle product handling, minimizing the chances of damage.
- Designed to work with differing numbers of "chutes", each set of change parts is optimized for maximum performance and throughput for each bottle size.
- Unitized change parts for major bottle changes results in a minimum of changeover time.
- The "BH" model includes an integral bulk hopper and elevator.
- Designed with only two moving parts, virtually eliminating downtime, the NECOSORT-S-3 carries a three-year warranty.

About Nalbach Engineering Company

Founded in 1945, our Company has earned its dominant reputation for quality and performance in the design and manufacture of a complete line of plastic bottle unscramblers and powder filling equipment. In addition, we offer aerosol fillers, turnkey packaging lines, and system integration services. A member of PMMI since 1958, Nalbach Engineering has developed equipment for a widely diverse client roster of Blue Chip companies and has installed systems in 45 countries around the globe.
